THIS ANSWERS YOUR QUESTION WHERE shall I buy Furs...?

HE advantages of buying furs in August have been established for many years. And so the question is not when to buy-but "where." Those who seek for the answer in the alluring fur advertisements will only have a confused mind unless they are capable of independent thinking.

> If you approach the problem of fur buying in a business-like manner we are confident that your answer to the question "where", will be . . . W. H. TAYLOR, Inc.

This decision will be your natural conclusion after an investigation of the standing of this institution and an inspection of the many remarkable garments that have been assembled for the great August occasion.

> We are conscious of these outstanding facts which are of great importance to you:

The fur fashions we present are authoritative. Each model is distinctive and smart.

The quality of the furs is dependable and honestly presented. All skins must measure up to a standard before they are accepted for TAYLOR garments.

> AND so the answer to your question "where to buy" is TAYLOR'S because it is a safe place to purchase furs at all times. During the month of August we expect to sell \$200,000 worth of furs. To do this we must give phenomenal values and we are prepared

the very birth of motion pictures—is now at your finger tips,

Eastman scientists find the way

Kodacoloris an optical attainment that has been years in development. Countless obstacles have been overcome. Millions upon millions of dollars have been expended in the quest for color fidelity. Now, the last barrier has been swept away. The goal has been reached. And you and thousands of other amateur motion picture makers reap the harvest, easily, inexpensively.

With your Ciné-Kodak Model B, f. 1.9, a small, easily attached filter and a special film, you can make motion pictures in true colors. No extra lenses are necessary. No costly tinting or toning. Just an inexpensive color filter, a reel of Kodacolor film, plenty of bright sunlight and Ciné-Kodak Model B. £1.9. That's all—and Full-Color Photography is yours.

To obtain Kodacolor pictures it is only necessary to load the camera in the usual way with Kodacolor film and to slip the

History repeats itself-glamorously!... Forty years ago, in eighteen hundred and eighty-eight, we announced still pictures in black and white for the amateur. The whole story of the system was told in the one line, "You press the button; we do the rest."... Today we announce motion pictures in full color for the amateur, and the whole story is told in the one line, "You press the lever; we do the rest."... All the amateur needs to do is to load his Ciné-Kodak with Kodacolor film instead of with the usual film and then slip the Kodacolor Filter attachment into place. He then proceeds to take pictures just as be would with the regular film. It's all as simple as that. "You press the lever; we do the rest."

special filter into the lens barrel of the Ciné-Kodak, Model B, f. 1.9. The camera is then used in exactly the same way as for black and white, the only restriction being that it is necessary to take pictures in direct, bright sunlight.

The exposed film when taken out of the camera, for the present is returned to Rochester for special processing. The cost of this processing is included in the price of the film. When the film is returned by the Rochester processing station, it is projected in a Model A or Model B Kodascope especially equipped for that purpose.

Pictures in Kodacolor are amazingly vivid, remarkably clear. They represent very accurately the colors of the originals. The only restriction on the projection is that the color filters absorb a great deal of light, and it is necessary to be content with a small picture on a special Kodacolor screen. The largest picture that will be satisfactory is 161/2 x 22 inches.

A privilege only Ciné-Kodak owners

Owing to the optical requirements of the Kodacolor process, the only camera fast enough for this work is the Ciné-Kodak Model B with f. 1.9 lens. When this camera was

made it was designed so that all that is necessary in order to convert it to a Kodacolor camera is the attachment of a special filter holder which slips into the lens barrel. Both the Model B Kodascope and the Kodascope Model A may be adapted to Kodacolor work.

The modification of the camera and the projector for the Kodacolor process in no way interferes with their use for ordinary black and white motion pictures.

When the Ciné-Kodak is used for taking, or the Kodascope is used for projecting, a color filter is employed on each.

When you again want to use them for black and white you simply take off the filter—elapsed time, one second.

All natural colors strikingly reproduced

Kodacolor utilizes all three colors required for the correct reproduction of every color occurring in nature. It is hardly possible to conceive of the marvelous fidelity to natural color that is available through this new process. Colors that you think impossible to reproduce are there before you on the screen in all their natural brilliancy. Brilliant yellows, reds, oranges, blues, greens, browns, purples-in fact, every color that the eye registers is shown on the screen. No more wonderful achievement of optical science has been registered since photography began.

The Chicago public is cordially invited to an interesting exposition of this new and remarkable development in the art of making home movies. To see motion pictures in Kodacolor is an experience you will not soon forget. It awaits you now, at your Ciné-Kodak dealer's . . . Eastman Kodak Company, Rochester, New York.

There is no general jublic interest in Boulder Dam. The contest between private wealth and the public, if there is one on the Pacific coast, is of importance there. If we will choose a mayor who proposes to have efficient and honest police work, we can have it.

THE MINERS' WAGES.

A joint committee of Illinois coal miners and mine operators is attempting to work out a new contract which will be acceptable to both miner

It was not found possible to reach an agree ment as long as the miners held out for the terms of the Jacksonville agreement as a minimum. The union has at last formally abandoned that agreement as the basis for negotiation, which means that the union is prepared to take lower wages. The question now is, How much lower?

It is to be hoped that the operators will not press their present advantage too far. A general lowering of wages in an industry is demoralizing. Miners are not accustomed to high wages as we know them in the well-organized skilled trades. Any reduction will mean serious deprivation to the workmen and their families. The lowering of income can result only in less schooling for the children, a meaner diet, more crowded homes, poorer clothing, fewer recreations, and a lessened ability to meet the misfortunes that must be expected in every family. Reduced incomes must result, as well, in a general lowering of the pur chasing power of scores of mining communities throughout the state, a reduction which will be reflected not only in the reduced prosperity of the retailers in these communities but also in the ledgers of the manufacturers, wholesalers and

jobbers who supply these tradesmen. Possibly these considerations will not weigh as heavily as they should with the mine operators estate fraud of the Golden State, and if that a reduction in the standard of living of their is trouble to be made in the presidential employes will tend to make their workmen sullen mpaign by this, the senator is the man with and susceptible to the arguments of radical agitators. for School

Can't you remember the rush and hurry of those last days' packing just before boarding the train for school? The lock on the old trunk was broken, the lining all worn out and you dashed down to buy a new one and couldn't find the kind you wanted. Others had been wiser and bought ahead of time. This year it is your turn! Avoid the time demon! Buy your trunk now and pack at your leisure! Sketched are our Special August trunks for school and travel needs.

HOOVER PREFERS **CAMPAIGN LIMIT** OF 3 OR 4 TRIPS

Is Opposed to Ballyhoo as Political Mode.

Stanford University, Cal., Aug. 6.—
(A?)—Unless the party managers are able to dissuade him from his purpose, Herbert Hoover will make only three or four more trips during his campaign for the presidency.

There will be no "swings around the circle," it was stated officially here today, and the trips will be brief with only a few speeches. This is in line with the determination of the Republican candidate to refrain from any attempt at a ballyhoo and to keep

was reiterated that only one set speech will be made on the return to Washington from here—that at Hoover's with Dwight F. Davis, secretary of birthplace at West Branch. In that address the candidate will give particular attention to the agricultural questions, dealing largely with what he regards as the indirect, rather than the direct, means of aiding the farmers. He feels that not enough stress has been laid upon this side of the problem, a side which he regards as of high importance.

The Republican nominee spent a quiet Sabbath, attending services at Stanford university chapel in the foremon with Mrs. Hoover their son, and also will decide whether he will make a three day trip into the Sierra mountains of California. If he goes, he will leave here Tuesday and return Thursday.

It was learned that Senator George H. Moses of New Hampshire, chairman of the notification committee, will arrive here Thursday and that chairman Hubert Work of the Republican national committee will follow him by a day. Work will be accompanied by Gov. Fisher of Pennsylvania was reiterated that only one set speech paign unique thus far.

An Unusual Women's Wear Shop In Evanston

METROPOLITAN in character, yet located away from the noise and congestion of the loop, the new Evanston shop of Edgar A. Stevens is deemed an innovation among apparel shops. Although it is only a few months since the opening of the shop, the clientele has increased far beyond all expectations. Residents of the north shore have sponsored it since the day of the opening, and now fashionables come here from all parts of Chicago, for they know that they may be assured of securing garments of true distinction and that a highly individualized service is rendered.

Only the most authentic and desirable of the new modes are presented. The commonplace, the inartistic and the bizarre are taboo. Every garment in the collections must meet with the dictates of good taste and a noteworthy standard of quality.

First of all, this delicate new cereal tastes so good. Crispy; crunchy: like golden-brown nutmeats.

But it's "so good" for another reason, too! For Heinz Rice Flakes are naturally "laxatized" by an entirely new process in cereal-making. This process was developed and is owned exclusively by Heinz. It so utilizes the natural roughage of the rice itself as to impart to the flakes the qualities of a mild, natural laxative.

The whole family will respond to the new taste-thrill of Heinz Rice Flakes. And Heinz Rice Flakes will respond to the needs of the whole family by helping Nature to keep them in the pink of health-full of the "Joy of Living".

For speed in reaching final adjudication in felony cases and in percentage of convictions, Milwaukee's court record substantially outdistances that of Chicago and Illinois, according to a section of the report of the Illinois sociation for Criminal Justice, which made public yesterday. This portion of the survey was prepared by Dr. C. E. Gehike.

Milwaukee was chosen for purpor of comparison, it was explained, because of its proximity to Chicago and lecause of the reputation for efficiency enjoyed by its courts. Statistical conclusions of the survey are based upon an analysis of 16,812 felony cases which entered the courts of twenty lilibois counties including Cook and of the disposition of 1,828 felony cases

More than 35 per cent of the felony cases in Chicago are eliminated by prosecutors, while only 7 per cent are disposed of in this manner in Milwaukee. On the other hand, Milwaukee's judges are responsible for more than one-half the eliminations, while less than one-fourth of the eliminations in Chicago are on the responsibility of the judge.

The practice of Milwaukee courts in granting many probationary sentences is held responsible for a lower percentage of sentences executed without change of term than in Chicago. In Milwaukee 56.54 of the sentences are carried out unchanged, as compared with 74.64 in Chicago.

SLOW TO INDORSE NEW NAVY LIMIT PLAN OF EUROPE

U. S. Seeks More Light on Recent Proposals.

Washington, D. C., Aug. 5.—[Special.]—State and navy department officials are not inclined to warm up to the latest European scheme of limiting world navies.

Fear that the new Anglo-French compromise plan for limiting warships not covered by the Washington treaty is designed to limit classes of ships vital to American sea power, while leaving the field open for competition in certain classes of ships petition in certain classes of ships useful to Europe but of no value to the United States, is one of the big factors responsible for the American attitude.

The mystery with which French and British officials have shrouded their "agreement," and the failure of Sir Austen Chamberlain, British forign secretary, to inform the United States fully regarding the details of the British understanding with the Frenech furnish is another cause for rritation on the part of Secretary of State Kellogg and other American Then Turns to Music and

BY EDWARD BURNS. Little Moose Walsh was the fellow iose 40,000 fans were talking about

as they filed out of Comiskey park yesterday after-noon. Babe Ruth? Sure, he was there. Lou Geb-rig? Lou played, too. But yester-day they were just a couple of ball players. It was Little Moose all the way.

The score was White Sox, 5; Yanks, 4. The were ahead and they never were tied with the Sox

after the first inning. And the principal reason was Little Moose. Big Ed Walsh's older boy struck out o less than nine New York batsmen. The Babe himself fanned once, so did Lou Gehrig. Bob Meusel whiffed twice. Henry Johnson, the Yank pitcher who recently made five hits in one game, fanned all three times he faced Young Ed. In every inning but the seventh and ninth he struck out

He had a swell excuse for blowing up in the ninth when three of his associates crossed their traffic signals and allowed a high fly by Ruth to drop for a double in the Sox scored a 5 to ninth inning rallies. But he stuck it through to the end.

time in the spring, is less representative now, and Robertson, first under study for Joe Dugan at third base has imperfect command of his lines and business, the entire situation summing up as a terrible fix for ading ball club, pursued by a team so energetic as the Athletics in

It is startling to learn that Wilcy Moore, the relief pitcher who won 23 games one way or another in 1927, has won just two this season, one on his own account and another on be-half of someone who had started something he couldn't finish. This young man became a mystical figure along toward the close of last season, a stranger who could crawl out of the hatch giving onto the players cage and amble onto the lot at any time to defend a lead or retrieve a loss against any team in the league Killed Interest in Race.

The Yankees evidently are not to be trusted. Not only defeated, but kicked around in the spring for the last two years, they have come north to open the season with a run of vic-tories that placed them for out in front each time. Departing for their first western tour this year they were so nearly-invincible that the custom ers lost interest in the other teams and only paid their admissions when the Yankees were on hand. It was a this time that your correspondent fel emboldened to state that they were at present the greatest ball club ever amassed and to urge the customers to witness them as an historical group who might not pass this way again in the same perfect condition.

Not ten days later, the Yankees
were losing ball games to the White
Sox and they looked so comical that
persons of what Mr. Tunney would call a certain mentality, wondered whether this could have been done under instructions so that the customers would renew their interest and their patronage.

TANDING large among the factors which have brought the Chicago Tribune the largest volume of advertising in the world, is its circulation in the cities around Chicago.

Step forth in any of the cities and towns within six hours ride of Chicago at breakfast time, and watch what happens at the newsstands. Side by side with the piles of the local newspaper you will see piles of Chicago Tribunes. Note that most customers take both. Note that the citizens of the community read the Tribune with every bit as much care as they give to their own home newspaper. Talk to them and see that they follow it as assiduouslypraise or condemn it for individual editorials and policies-in as great a measure as the citizens of Chicago.

In the soul-stirring days in 1858, crowds waited for the Chicago train to read the Tribune's reports of the Lincoln-Douglas debates. Later, returning Civil War veterans, fired by the Tribune's loyal stand, trained their sons to read and follow it. The Tribune through the years has entrenched itself in the hearts of the people in the thousand towns that are Chicagoland. And continning to serve, it retains this hold in full measure today.

A long list of local newspapers, bolstered with magazine combinations at a tremendous milline rate, can be made to yield Zone 7 circulation equal in numbers to that of the Tribune-but no list, no combination, can give the selling power enjoyed by advertising in the Tribune. To get the maximum sales power purchasable in Zone 7, make adequate use of the Chicago Tribune.

And another thing-

IN CHICAGO AND SUBURBS ALONE THE DAILY TRIBUNE EXCEEDS THE CIRCULATION of the NEXT HIGHEST CHICAGO NEWSPAPER BY

New Rules for Loans.

Two suggestions will be adopted, first, an increase in the service charge by banks to corporations for money handled on call; second, the establishment of a \$100,000 minimum for loans of this class. Since these new regulations do not take effect until September, it will be interesting to see just how the situation will work itself out during the month of August.

The Trend of The Motion Picture Industry

CURRENT DEVELOPMENTS in the Motion Picture Industry point to greatly increased earnings by the larger companies. Through recent mergers and consolidations which have been effected more efficient and more profitable operation has been obtained.

Producers and exhibitors have formed connections of demonstrated importance from the standpoint of operating economies and increased income. The benefits of these developments already felt, will, it is believed, be fully harvested during the next several years.

Further combinations among the larger units may be expected in view of improved conditions existing as a result of mergers to date.

In our opinion the securities of certain of the larger companies offer an exceptionally attractive opportunity for profitable investment. We have prepared a pamphlet covering in a comparative tabulation the Market Value, Earnings, Book Value, Dividends, and Yield of the companies listed below:

Paramount Famous Lasky Corp. Warner Brothers Pictures Inc. Schine Chain Theatres Inc. Keith Albee Orpheum Corp.

Loew's Incorporated Fox Film Corporation Stanley Co. of America Universal Pictures Inc.

The pamphlet enables judicious selection of these securities based on facts. We will gladly mail you a copy on request.

Sanitary Postage Service Corporation

This Company owns and has in successful operation more than 20,000 of its well-known Sanitary Postage Machines from coast to coast. Its Machines are now selling over 120,000,000 postage stamps yearly. United Cigar Stores; Schulte Cigar Stores; Liggett Drug Stores; Owl Drug Stores, etc., are equipped with these Machines.

Thus, Automatic Postage Service is already a national institution. The generous patronage of the Machines by the public is an indication that it readily appreciates the cleanliness and convenience of the Service.

The Company's program for the next five years calls for the installation of 80,000 additional Machines. With this accomplished, the so-called "accommodation," consisting of supplying the public with loosely handled, finger-printed postage stamps,—a loss to the merchant and a danger to public health,—will practically cease to exist. The distribution of stamps through dealers will then be placed on a Sanitary and business-like basis.

Automatic Merchandising Corporation of America

This Company, through the inventive genius of Joseph J. Schermack, has produced the battery (15 units) of the Talking Automatic Merchandising Machines, combined with a Change Making Machine, now in operation in the United Cigar Store, at 33rd Street and Broadway, New York City. This installation has created a national sensation.

The Machines not only make change and deliver the merchandise, but also say "Thank you"—together with the Manufacturer's slogan—while delivering the goods. Arthur Brisbane described the Machine as "an almost human automaton." An Associated Press despatch stated that "The Machine does everything but slap the customer on the back and ask him how his family is."

Following this success, installations have been made with Liggett Drug Company and Arnold, Constable & Co. Among others, a contract has been closed with Schulte-United, Inc., for the equipment of all their Department Stores with Talking Automatic Merchandising and Change Making Machines. The Schulte-United, Inc., contemplate establishing up to 1,000 Department Stores of the 5¢ to \$1 variety.

This Company, as a part of the Consolidated Automatic Merchandising Corporation, is planning to place at least 100,000 batteries in the best retail locations throughout the country.

General Vending Corporation

This Company has approximately 36,000 of the famous Peerless Weighing Scales and 30,000 Hoff Vending Machines in operation.

The "Girth of a Nation" is the key both to health and beauty, with the result that during the year 1927 nearly 300,000,000 people weighed themselves on the Peerless Scales. It is estimated that these people, standing close in line, would reach about twice around the earth.

The program for the next five years, calls for the additional placing of 24,000 Automatic Weighing Scales and 220,000 Hoff Vending Machines in operation. The Corporation, through its subsidiary, The Hoff Vending Corporation, owns an exclusive contract for the automatic vending of the famous Wrigley brands of penny chewing gum, except for certain locations covered by old contracts, which do not conflict with the business of the Corporation.

Recently, the Company concluded an exclusive contract for the automatic selling of the "Life Savers" products, and the Company's expansion program has provided for the placement of Machines for the sale of these products.

Machines of the Consolidated Automatic Merchandising Corporation will be produced and guaranteed

dence.]—Blouses are today more than an accessory. They are an accomplice. They conspire with the separate skirt to kill off our habitual interest in the regular one piece frock. Undoubtedly Patou had much to do with this state of affairs. For when in his tabloid wardrobe he showed a single black satin skirt conspiring with a white satin blouse to make the most charming of afternoon frocks he convinced the most skeptical heart of all that could be done with a blouse in the way of formality.

It is safe to say that never were blouses more varied nor more charming. Many of them are in all white, yet color is encouraged, especially in the new wash silk which is being so widely utilized for this garment. This wash silk of aristocratic bearing comes in the most delightful tones—rose, lavender, blue, coral and what not, and a number of such blouses mated with our separate skirts will certainly make a wardrobe.

We show the new wash silk today carried out in a blouse which is full of delightful new touches. The color chosen is coral and, like so many of the new blouses, this one affects geoses are today more than
